Assignment 1

Rob DiVincenzo 09-11-2023 BA 64060

This is the submission for Assignment 1.

```
#Tasks 1 and 2, download dataset and import into R. I'm using the Cereals.csv dataset located in our co
DF=read.csv("./Cereals.csv")
library(dplyr) # Install the dplyr library
```

```
##
## Attaching package: 'dplyr'
```

```
## The following objects are masked from 'package:stats':
##
##     filter, lag
```

```
## The following objects are masked from 'package:base':
##
##     intersect, setdiff, setequal, union
```

```
#Task 3, print out descriptive statistics
summary(DF)
```

```
##      name               mfr                type              calories
##  Length:77          Length:77          Length:77          Min.   : 50.0

##
```

```
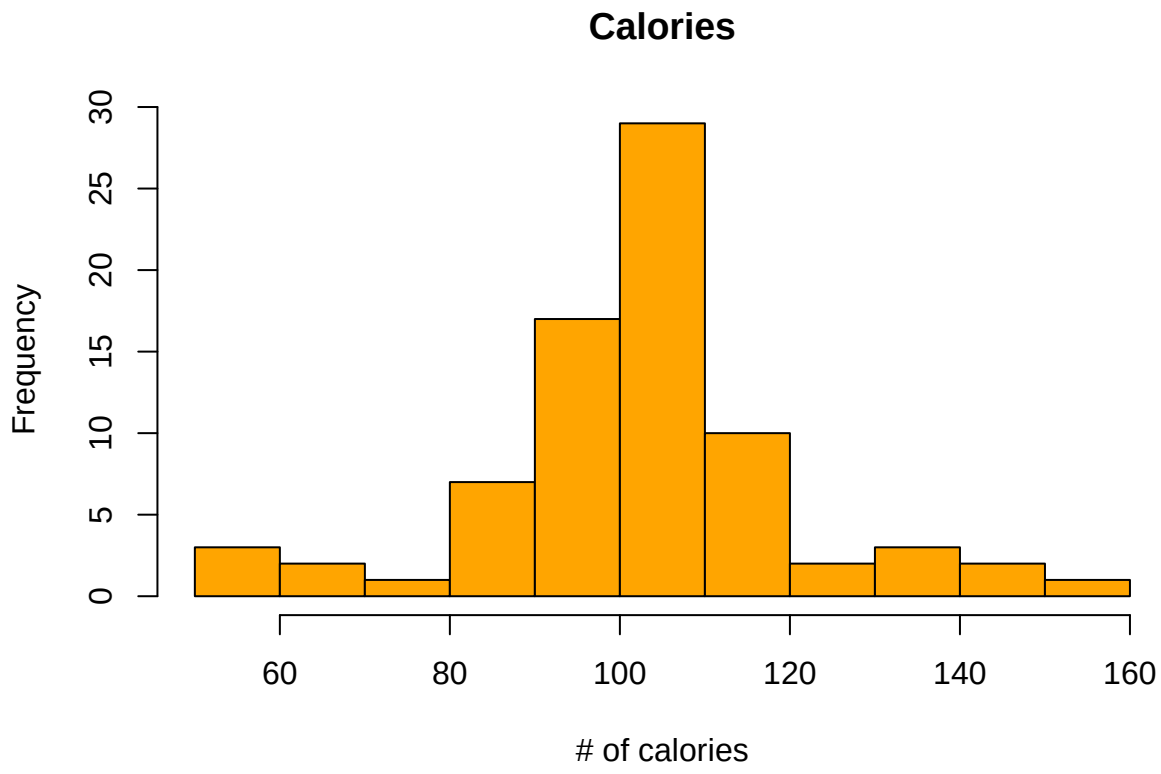
#Task 4 - data transformation, I'm going to summarize the number of different mfr in the dataset

task4_mfrs <- DF %>% group_by(mfr) %>% summarise(manufacturerers=n())
```

```
#Task 5 - Plot one qunatitttative variable, and one scatterplot

hist(DF$calories,
     main="Calories",
     xlab="# of calories",
     col="orange",
     freq=TRUE)
```



```r
plot(DF$calories, DF$sugars)
```
